BULGARIAN PLANTS, MINES CRITICIZED;
PLANS FOR NEW TEXTILE COMBINE

SCORE PLANTS, MINES -- Sofia, Novo Vreme, Aug 52

Many Bulgarian industrial plants have been reorganized for specialized production. The "Vasil Kolarov" and "Kliment Voroshilov" plants produce electrical machinery, the "Chervena zvezda" plant produces construction machinery, the "Georgi Kirkov" plant makes boilers, the "Mekhanichen zavod" (mechanical plant) builds metal-cutting machinery, the "Stalin" plant produces mining machinery and there is also a cable plant.

In some enterprises, mastery of technology is unsatisfactory. For example, in one mine of the "Georgi Dimitrov" Hard Coal Mines, during the fourth quarter of 1951, and S-153 loading machine worked only 30 percent of the planned time. There is squandering of coal, and full production time is not utilized. In one of the mines, there is a 38-percent loss because work begins late and ends early and because workers must wait for tools or empty wagons.

Some enterprises do not take sufficient measures to assure simultaneous operations. In the "Georgi Dimitrov" Concentrate Plant, the handling and crushing of ore is done by hand.

According to its plan the "Purvi may" tekstilna fabrika (1 May Textile Mill) in Stalin was to produce 89 percent high-grade fabrics and 11 percent second grade fabrics. Instead, during February 1952, it produced only 83.5 percent high-grade fabrics and 9.5 percent second-grade fabrics.

Workers from the worsted section in the "Georgi Dimitrov" durzhaven tekstilen kombinat (State Textile Combine) in Sliven work from 100 to 200 spindles instead of 80, which is the norm.

During the first quarter of 1952, the coefficient of exploitation of spinning machines in the cotton industry was in general 4/5 percent lower than planned.

STAT

COMBINE TO BE BULGARIA'S LARGEST -- Sofia, Rabotnichesko Delo, 15 Aug 52

Plovdiv, 14 August -- The foundations of a new spinning mill were laid on 14 August 1952 near the "Maritsa" tukachna fabrika (Weaving Mill) in Plovdiv. The spinning mill will be a part of the largest textile combine in Bulgaria. The new spinning mill will produce yarn for the stocking, ladies' underwear, and weaving industries. A dye shop and a mercerizing shop will be built near the spinning mill.

By 31 March 1953, 30,000 spindles of the new shop must be in operation. By that date, 714 narrow automatic looms to which machines for finishing light and fine cotton cloth are attached will be installed.

The combine is being built with the intention of developing long-fiber cotton in the Plovdiv, Pervomay, Chirpan, Stara Zagora, and Khaskovo cotton-producing regions.

The combine will cover an area of 32,000 square meters and will be constructed of reinforced concrete. The combine will be well lighted glass roof and will have a humidifying and a dust-prevention installation. A cultural center with more than 500 chairs will be built in the vicinity.

CHERVENKOV CONGRATULATES ENTERPRISES -- Sofia, Otechestven Front, 5 Sep 52

For fulfilling its plan, Chervenkov recently congratulated the "Tavetmetprom" DIP (State Industrial Enterprise) in Gara Iskur. The enterprise director is B. Serafimov, A. Lazarov is secretary of the party organization, K. Stoyanov is chairman of the trade union committee, and St. Grigorov is secretary of the DSNM (Dimi-trov Union of People's Youth).

Otechestven Front, 6 Sep 52

Chervenkov also congratulated the "Pobeda" (Victory) DIP in Kolarovgrad for fulfilling its plan. The enterprise director is G. Ganchev, D. Vasilev is secretary of the party organization, D. Cheshmedzhiev is chairman of the trade union committee, and N. Mateev is secretary of the DSNM.
